PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in full-stack development, AI-focused systems, database-driven applications, and real-world client work. Developed a Django-based loan management system for a business client, with prior IT support experience and published AI research. Skilled in Python, Django, JavaScript, PHP, React, SQL, Git, and relational databases.

TECHNICAL SKILLS

Languages: Python, Java, C++, PHP, JavaScript, HTML, CSS, SQL, VB.NET, Dart

Frameworks & Development: Django, Flask, FastAPI, React, Flutter, Tailwind CSS, Windows Forms

Databases: MySQL, MariaDB, PostgreSQL, SQLite, Microsoft SQL Server

Tools & Platforms: Git, GitHub, VS Code, Visual Studio, XAMPP, Postman

Certifications: Data Science & Analytics - HP LIFE (2026) | SQL Foundations - Microsoft × Coursera (2026) | AI Fundamentals - Google × Coursera (2026)

EXPERIENCE

Freelance Full-Stack Developer

Custom Loan Management Web Application | Dec 2025 - 2026

- Developed a custom Django-based loan management web application for a real business client, centralizing customer, loan, payment, ledger, receipt, reporting, and staff-access workflows.
- Translated business requirements and manual operational processes into structured application workflows, role-based access, and reporting functionality.
- Built and integrated features using Python, Django, HTML, CSS, JavaScript, SQLite, authentication controls, and document-generation tools.

IT Intern - Information Technology Unit

Lembaga Air Perak, Ipoh | Sep 2021 - Feb 2022

- Provided technical troubleshooting and support for employee computers, software, printers, and network-related issues.
- Assisted with workstation setup, system configuration, backups, and IT equipment checks as part of day-to-day IT operations.

SELECTED PROJECTS

AI-Driven Gamification for Personalized Wellbeing Monitoring

Bachelor's Final Year Project

- Developed an individual FYP module within a collaborative university mental-health application, focusing on mood-based interaction, wellness activities, rewards, progress tracking, and AI-assisted personalized feedback.

DevBoost - AI-Powered Developer Productivity Platform

Future Ready Hackathon 2025 | Team Lead

- Led a three-member student team developing a prototype that combined repository management, documentation generation, AI-assisted test creation, task collaboration, and activity tracking.

UCSI Road Damage Reporting System

Web Programming Group Project

- Developed frontend interaction logic for a campus road-issue reporting platform, including the user dashboard, submission forms, client-side validation, JavaScript modals, multi-photo preview, and report tracking.

EDUCATION

Bachelor of Computer Science (Honours)

UCSI University, Kuala Lumpur | Aug 2024 - Expected 2027 | CGPA: 3.54 | Dean's List

Diploma in Information Technology (Digital Technology)

Politeknik Balik Pulau | 2019 - 2022 | CGPA: 3.58 | Dean's List | Pingat Ketua Jabatan
